

WORLD SUSTAINABILITY CENTRE

Project code: ZL-006
 Project name: World Sustainability Centre
 Location: Breezanddijk, The Netherlands
 Period: 2009
 Status: Competition

The World Sustainability Centre is a place where people can be educated and excited about our planet and our endeavor to keep it healthy.

This design proposal envisions the WSC not as a building or a singular structure but a visual concept for a better future. The WSC should be a hub for research, development and education. Educational institutions and businesses will be able to use the WSC as a centre for innovation and exposition.

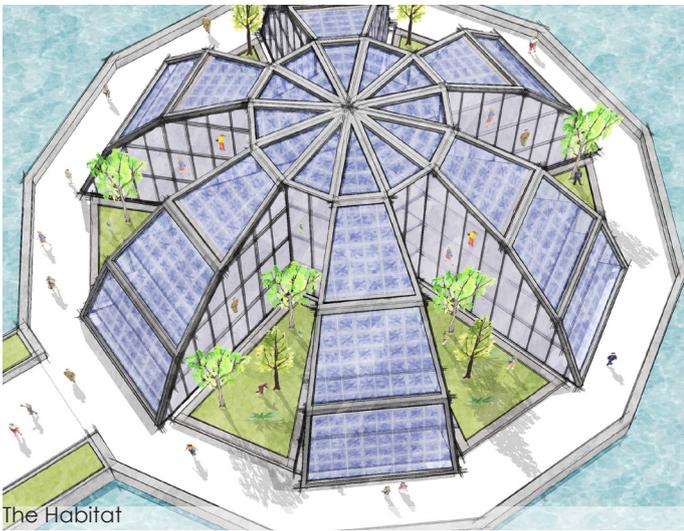

Therefore the WSC is not one building but more like small city in the middle of the Afsluitdijk. The focus of this city will be 'The Ark of Holland'. The ark is a floating structure that houses exposition spaces, workshop areas, a restaurant and a greenhouse.
